## About the Forms Posted on the U.S. Government Websites

*Only a relatively small number of PDF forms posted on the U.S. Government Websites are fillable.*

*Most fillable Fedform are not savable locally in Acrobat Reader.*

*There is a long list of errors and elements of low quality in fillable Fedforms. As a result, an average user is unable to fill-in even the "fillable" Fedforms.*

*The traditional Field-by-Field (FBF) method used by U.S. Government Agencies is extremely ineffective and slow. It can be used only to create a relatively small number of fillable pages. Clearly it is impossible to create tens of thousands of fillable forms with hundreds of thousands of pages, millions of fields by this method.*

*The system of electronic (HTML) online submission of all government forms is not realistic currently. Since U.S. government agencies are unable accomplish a single task: to add fill-in fields to tens of thousands of already existing forms in PDF format, it is illogical to expect from U.S. government agencies to be able to accomplish both tasks: to recreate all the forms AND to add all the fields in HTML format.*

*Government Paperwork Elimination Act (GPEA) is not realistic while government agencies continue to use the traditional Field-by-Field (FBF) method.*

*The direct loss of American people as a result of problems with tens of thousands of forms posted on U.S. Federal Government Websites is tens of billions (if not hundreds of billions) of dollars per year. Plus the indirect loss (that is much bigger than the direct loss). The situation with the gigantic number of forms posted on the Websites of the 50 states is not better than with the federal forms. The financial loss per month caused by problems with all the government form system is not only bigger than the cost of Iraq (both war and rebuilding) per month, but even bigger than the cost of all the war on terrorism. As a defense-related example, the number of fillable forms of the U.S. Department of Army is zero (out of 1589).*

*The only realistic option to create a large set of high-quality forms is the Insert-Text-Anywhere-on-Page (ITAOP) method. The field creation process is about 10,000 times faster than the traditional (FBF) method; the list of ITAOP features is not even available for FBF. ITAOP Fill-inDoc/savePDF method proved to be simple and reliable for (at least) hundreds of thousands (probably millions) of users all over the world (incl. individuals, companies, organizations, government officials).*

PART II: RECOMMENDATION OF COMMANDING OFFICER (OR OIC) OF MEDICAL TREATMENT FACILITY.

Based on the information available as a result of screening and on the capabilities of the Medical/Dental Treatment Facility in the area of assignment to which ordered, the following recommendation is forwarded:

1. Medical, dental and educational screening is conducted per BUMEDINST 1300.2.
2. Recommendation is based on a review of NAVMED 1300/1, Part I and II. One form is completed for each service and family member screened.
3. If a shaded block is checked on NAVMED 1300/1, coordination is required with the gaining MTF/DTF supporting the overseas, remote duty or operational location or with the senior medical department representative of an operational platform. Coordination must indicate whether or not required medical, dental or educational capabilities are available.
4. Family member screening is not required if an unaccompanied tour of 24 months or less (except for Diego Garcia or Souda Bay, Crete).
5. Do not forward sensitive medical or personal information with this form.

The following recommendations are made based on a review of each NAVMED 1300/1, Part I and II, and if required. The response from the gaining MTF/DTF or senior medical department representative of the operational platform:
